Phone 865-1601

Message Wanted to know who
complained about oil
because she said they
didn't do it. She
thought maybe the
person who complain
ed saw who dumped
it there. I told her
the City didn't give
out that information.

Ms. Margie Turner, Manager
Be-Mac Transport Company, Inc.
2854 East Kearney
Springfield, MO 65803

Dear Ms. Turner:

This office recently received a call regarding the possible improper disposal of waste oil on the Be-Mac Transport Company's property at 2854 East Kearney in Springfield, Missouri.

On April 3, 1990, I investigated the complaint and observed an area about 12 feet by 25-30 feet on the southwest corner of the lot where waste oil had been dumped on the ground. There were truck tire tracks through the oil and it appeared that the dumping may have occurred more than once. There were at least two areas where waste oil was pooled in the ruts from the tires.

Please note that waste oil is a hazardous waste in Missouri and that the regulations state that it shall not be introduced into the environment but must be properly disposed of. I was advised by office personnel that the facility does vehicle maintenance at the site and there is believed to be a company that picks up the waste oil from the shop.

In accordance with department policy, Be-Mac must have the contaminated soil analysed for EP Toxicity for metals to determine whether the soil must be handled as a hazardous waste or if it can go to an approved sanitary landfill for disposal. If the analyses indicates that it does not fail the test for hazardous constituents, Special Waste Disposal approval must be obtained prior to the material going into a landfill. A form for requesting the special waste disposal approval has been enclosed.

Clean up of the site must include all visibly contaminated soil and vegetation from the dumping area. To prevent further migration of the contaminants and an increase in the amount of material needing to be cleaned up, it is advised that the contaminated soil be scraped up, stockpiled, and covered while awaiting test results and completion of the paperwork.

Please advise this office of the scheduled date for sampling and completion of the analysis of the soil and of the proposed cleanup schedule. Your reply within fifteen days of the date of this letter will be expected and appreciated. If you have any questions, please advise.

Sincerely,

SOUTHWEST REGIONAL OFFICE

Charles L. Kroeger
